

# What's New at AccuStandard.com

We've added some important new features as part of our ongoing commitment to making our customer's jobs easier. When you click beyond the homepage, you'll see many familiar pages and functions. But first, let's review key changes:

## Homepage - We hope you like our new design

- New: Featured item - every month, we'll post a new link going to important, timely, or industry-related information
- Reorganized content: Scroll down on homepage to see sections for:
  - Product Highlights
  - New Products
  - Spotlights
  - Catalogs & Brochures
- New quick-links:
  - Find SDSs & COAs
  - Synthesis
  - Contact Us

## Navigation - Much easier to reach products by category

- New menu - all categories and subcategories appear in one easy-to-use menu screen (no more "fly-outs")

## Search - Major functionality upgrade!

- Search field in top bar now puts all search capabilities in one place
- Smart search - start typing and you'll see auto-fill appears
- Enter a long search term and the box expands so you can see all of what you're entering
- Add multiple items at once!
  - Paste in a list of Catalog Numbers, Analyte Names, CAS Numbers, or Element Abbreviations. Paste from a text document with each item separated by a hard return, or from a spreadsheet column.
- You'll see the auto-fill functionality at work throughout the site, for example, on the Custom Quote Request form where you enter Components.

## Updated Cart Functionality

- Old site had all checkout functions on one long page with a series of steps
- New site has 2 pages, less scrolling
- Follow progress via sidebar
- Review Order is via clicking a button before submitting the order
- We will be further refining checkout functionality in the coming weeks

Update

## Product pages - CAS Numbers

- CAS numbers are now at the top of the page for single component products

2,3,4,5-Tetrachlorophenol  
CAS# 4901-51-3

## Requisition Lists - "My Lists" tool simplifies repeat purchases

- The "Saved Items" functionality has been replaced by the far more flexible and useful "My Lists" tool
- You must be logged in to access this feature
- You can create as many requisition lists as you want and define them as desired based on product type, department, frequency of reorder, or other criteria. Examples: "Monthly Orders", "PFOA and PFOS Standards"
- It's easy to create lists, then add, remove, and move items anytime
- Items stay on a list even after they've been ordered. This makes it easy to use a list for future purchases. You can easily reorder an item exactly as it was previously defined. No need to redo research, rebuild orders, or search through past orders each time you reorder.
