COVID-19 Response from AccuStandard

At AccuStandard, we consider the safety and wellbeing of our employees and customers to be paramount. Our leadership team has been closely monitoring the global spread of COVID-19 and have been making proactive adjustments to our operations in order to ensure the continued service and expertise you count on.

We currently are not experiencing any slowdown in shipments and have been able to provide our customers with the products they need to continue their important work.

In order to continue our commitment to you while minimizing risks to our employees, we have:

- implemented remote work solutions for our employees wherever possible to maintain our work flow;
- suspended all business travel and replaced it with online communications;
- postponed and avoided scheduling group gatherings of employees and vendors.

Our technology infrastructure offers us the resources and flexibility we need to stay in close, personal contact with you and one another.

As this situation evolves, we will continue to update our practices and, where necessary, commit resources to support the needs of those who depend on us in both the short and long term. In the meantime, we would like to share our wish that you, your family, and your colleagues remain well.

Feel free to contact us for additional support.
